REACH registration for sulphuric acid

01.02.2021

Dear Sir or Madam

In conformance with Directive EU/1907/2006 Aglobis GmbH has registered as REACH-Registrant in November 2010 for sulphuric acid.

The ECHA database in Finland contains the associated number and relevant data which are decisive for a regulatory compliant and timely execution of the registration. The amount of sulphuric acid exceeded the 1,000 T/a threshold right from the beginning of the REACH-era. No REACH-relevant changes have applied since then.

At the same time, we can confirm that all our suppliers for sulphuric acid have (pre)registered as well and indicate their ECHA numbers in their safety data sheets (SDS). Considering that we are supplied with sulphuric acid from several sources, we have replaced the last four digits of the registration number by XXX in our SDS, which is still in accordance with REACH standards.

Our registered data are:

product name: sulphuric acid, 15-51% and 51-98%
CAS no.: 7664-93-9
EINECS no.: 231-639-5
registration no.: 01-2119458838-20-0078 (...-XXXX)
date of registration: 19.11.2010
submission report no. ECHA: SP 942033-24

Please feel free to contact us if you wish to have any additional information.

Kind regards
Aglobis GmbH
